

H. CANNELL & SONS'

F.R.H.S., H.M.C.A.B.

CATALOGUE OF

BULBS,
Tuberous-rooted Plants,
Strawberries and Violets.

1909-10.

ROSES,

Horticultural
Establishment.

SWANLEY, KENT.

All Roads lead to CANNELLS' HORTICULTURAL ESTABLISHMENTS
for the supply of everything for the Garden.

The Swanley and Eynsford Nurseries adjoin the Stations.

Swanley—50 Glass Houses, 14 acres of Flowers. Eynsford—150 acres of Fruit Trees, and
2 acres of Flowering Trees—23 acres of Flowering Trees and Shrubs—6 acres of Roses.

The Cockmannings Nursery (25 acres of Shrubs) is $1\frac{1}{2}$ miles from St. Mary Cray Station. Conveyances, if intimated a day before.

Our Trade Mark is—"COME AND SEE."

Telephone No. 3 G.P.O. SWANLEY JUNCTION.

All correspondence to Swanley.

Fruit Trees, Shrubs, Ornamental Trees, Hardy Herbaceous & Rockery Plants, &c.

Should Catalogues of the above be desired a Half-penny Postcard will bring one per return post.

The meaning of this is they are limited, and it is only occasionally they are required. We hope no one will fail to kindly assist us by their recommendations.

The HOME of FLOWERS.

SWANLEY, KENT.

Sir, or Madam,

Please accept this Catalogue, and peruse the contents with the full assurance that the goods offered are of the finest possible quality.

We are the chief winners of Prize Medals, Cups, and Gold Clocks in England, and these from the most important Horticultural Societies. Our first consideration is to supply excellence of quality in all goods.

Growing and purchasing on such a large scale, with our resources, combined with our most favourable soil and climate, and our exceptional experience and attention, we not only secure the best possible terms in Home and Foreign Markets, but we obtain and grow the pick of the World's produce for our customers. We are thus enabled to maintain our high standard of excellence, at prices as low as possible.

By firmly adhering to this policy of giving the benefit of our unrivalled facilities to our patrons we have been enabled to attain our present pre-eminent position.

Our terms of business, packing, forwarding, and other arrangements will be found as near perfect as possible, and should you decide—we hope you will—to give us your order, we are confident that the excellence of our goods, combined with moderate prices, the careful attention of our assistants, and the great advantage (which cannot be over-estimated) of obtaining everything for the Garden from one reliable firm, will ensure you permanent success.

We shall be pleased to forward you any further particulars or quotations, or any Special List on application.

We remain, Sir, or Madam,

Yours obediently,

H. CANNELL & SONS.

A SELECTION OF PLANTS SPECIALLY FOR EARLY FORCING and AUTUMN and WINTER DISPLAY.

ABUTILONS—Bloom all the winter. 8s. to 12s. per dozen.
AZALEAS—All the very best varieties. 2s. 6d., 3s. 6d. and 5s. each, our selection.
AZALEAS, GHENT—Yellow, in many shades, for forcing. 18s., 24s. and 30s. per dozen.
BEGONIAS, Winter-flowering—All the best varieties, in flower or showing flower. 1s. each; 8s. and 10s. per doz.
BEGONIA, TURNFORD HALL—White flowers. 1s. 6d., 2s. 6d., 3s. 6d. and 5s. each.
BEGONIA, GLOIRE DE LORRAINE—Grand for the winter season. 1s. 6d., 2s. 6d., 3s. 6d. and 5s. each.
BOUWARDIAS, SINGLE (President Cleveland, Priory Beauty, Bockii, Vreelandi, and all the leading kinds)—Good flowering plants. 18s. per dozen.
BOUWARDIAS, DOUBLE (Pres. Garfield, A. Neuner and Hogarth fl. pl.). 18s. per dozen.
CALLA AETHIOPICA (Arum Lily). 12s. & 24s. per doz.
CAMELLIAS—The best and most useful. 2s. 6d., 3s. 6d., 5s. and 7s. 6d.
CARNATIONS, Winter-blooming. 1s. 6d. to 2s. each; 12s. to 18s. per dozen.
CHRISTMAS ROSES—Pure white. 18s. to 24s. per doz.
CINERARIAS, Hybrid Seedlings—Our prize "March Past" strain. 8s. to 12s. per dozen.
CINERARIAS, DOUBLE—Our strain stands far ahead of any other. 6s. to 12s. per dozen.
CYCLAMEN—Fine plants with flower bude, and of the finest quality. 12s., 18s. and 24s. per dozen.
CYTISUS. 1s. 6d. each; 12s. and 18s. per dozen.
DIELYTRA (Dicentra) SPECTABILIS—Well-known forcing plant. 9d. and 1s.
DRACÉNAS, in variety—Fine foliage plants for the table. 2s. 6d. and 3s. 6d.
ECHEVERIA RETUSA. 1s. each; 9s. per dozen.
EPACRIS, various. 2s. 6d. each.

All the above are in pots, safely packed, and sent anywhere throughout Great Britain.

FORCING PLANTS. Cultivated for Pots and ready for Forcing.

ACER NEGUNDO FOLIA ARGENTEA VARIEGATA, 3 to 5 ft. 2s. 6d. and 3s. 6d.
ALMONDS (Double Flowering), red and white. 2s. 6d. and 3s. 6d.
BIGNONIA GRANDIFLORA. 2s. 6d.
CEANOHTHUS AZUREA GRANDIFLORA. 2s. 6d.
CEANOHTHUS GLOIRE DE VERSAILLES. 2s. 6d.
CERASUS AVIUM FL. PL. (Double-flowering Cherry). 2s. 6d. and 3s. 6d.
CERASUS CHINENSIS FL. PL. (Double-flowering Cherry). 2s. 6d. and 3s. 6d.
CHIONANTHUS VIRGINIA, white, 2s. 6d. to 3s. 6d.
CHOISYA TERNATA. 2s. 6d. and 3s. 6d.
CLEMATIS in sorts, with Jackmanii. 1s. 6d. and 2s. 6d.
CLETHRA ALNIFOLIA. 2s. 6d.
CYDONIA JAPONICA ALBA. 2s. 6d.
CYDONIA JAPONICA RUBRA. 2s. 6d.
CYTISUS LABURNUM, 3 to 5 ft. 3s.
DAEPHE CNEORUM. 2s. 6d.
DEUTZIA GRACILIS, 10 to 20 shoots. 1s. 6d.
DEUTZIA LEMOINEI FL. PL., 8 to 15 shoots. 1s. 6d.
DEUTZIA LEMOINEI FL. PL. COMPACTA. 1s. 6d.
GENISTA ANDREANA, strong. 2s. 6d.
GENISTA PRÆCOX, white, strong. 2s.
HYDRANGEA PANICULATA GRANDIFLORA, strong. 1s. 6d.
HYDRANGEA PANICULATA GRANDIFLORA, standards. 2s. 6d. and 3s. 6d.
HYDRANGEA CYANOCLADA JAPONICA, OTAKA, strong. 1s. 6d. and 2s.
HYPERICUM MOSERIANUM. 1s. 6d.
KALMIA LATIFOLIA. 2s. 6d. and 3s. 6d. each.
KERRIA JAPONICA FL. PL., yellow. 2s. 6d.
LABURNUM, pyramids. 2s. 6d.
LAURESTINUS, compact heads, 1s. 6d. to 2s. 6d.
LILAC, CHARLES X, blue, strong, and fully budded. 2s. 6d. and 3s. 6d.

ERICAS, in variety. 1s. 6d. to 2s. 6d. each.
FERNS, CUNEATUM (Maidenhair). 9d., 1s. to 2s. 6d.
FICUS ELASTICA—Beautiful foliage. 1s. 6d. to 2s. 6d.
GARDENIAS. 2s. 6d. to 3s. 6d. each.
HELIOTROPIUMS—Lord Roberts, and best winter-flowering varieties. 6d. & 1s. each.

HYACINTHS—All the best colours. 9s. to 12s. per doz.
HYACINTHS, ROMAN—Papery white. 6s. per dozen.

ISOLEPLIS GRACILIS—Good plants. 6d.

LILY OF THE VALLEY—12s. to 18s. per dozen.

DOUBLE & SINGLE ZONAL PELARGONIUMS (The best Winter bloomers)—Specially prepared in 5-inch pots, well set with bloom. 12s. to 18s. per doz.
PRIMULAS—Flowers all the season. 9s. to 12s. per doz.
PRIMULAS, DOUBLE (Alba plena). 10s. to 18s. per doz.
PRIMULA OBCONICA—Useful for cut flowers. 6s. 9s. and 12s. per dozen.

ROCHEA FALCATA—Winter blooming. 1s. each.

SALVIAS—All the best varieties. 9s. and 12s. per doz.

SCHIZOSTYLYS COCCINEA—A useful decorative bulbous plant during the winter 6d.

SOLANUMS—Full of berries. 12s. to 18s. per dozen.

SOLOMON'S SEAL (Polygonatum)—Very useful for forcing, good strong crowns. 6s. each. 5s. per dozen.

SPIRÆA ASTILBOIDES. 6s. to 9s. per dozen.

SPIRÆA JAPONICA (Hotela). 6s. to 9s. per dozen.

STREPTOSOLEN (Browallia) JAMESONI—Strong plants. 1s. 6d. and 2s. 6d.

TROPÆOLUMS—Useful for climbing in greenhouses. 6d.

TUBEROSES—In pots ready for flowering. 18s. per dozen.

TULIPS, DOUBLE AND SINGLE. 6s. to 8s. per dozen.

VIOLETS—All the best vars., fine plants in 5-inch pots. 9d. and 1s. each; 6s. and 9s. per dozen. Names, see List.

LILAC, MARY LEGRAY, fine single white, the very best for forcing. 2s. 6d. and 3s. 6d.

LILAC, MME. CASIMIR PERIER, fine double white. 2s. 6d. and 3s. 6d.

LILAC, MME. LEMOINE, fine double white. 2s. 6d. and 3s. 6d.

LILAC, PRESIDENT GREVY, large blue spikes (double). 2s. 6d. and 3s. 6d.

LILAC, SOUVENIR DE LOUIS SPATH, dark blue, large trusses, fully budded. 2s. 6d. and 3s. 6d.

LILACS, standards. 3s. 6d. to 5s.

MALUS FLORIBUNDA, pink. 2s. 6d. and 3s. 6d.

MALUS SPECTABILIS, double pink. 2s. 6d. and 3s. 6d.

MALUS SPECTABILIS GRANDIFLORA, fine. 2s. 6d. and 3s. 6d.

PÆONIA ARBOREA, of sorts. 3s. 6d., 5s. and 7s. 6d.

PHILADELPHUS CORONARIUS (Mock Orange). 1s. 6d.

PHILADELPHUS LEMOINEI. 1s. 6d. and 2s. 6d.

FRUNUS SINENSIS FL. PL. 2s. 6d. to 3s. 6d.

FRUNUS TRILOBA, double flowering. 2s. 6d.

PYRUS JAPONICA, red flowering. 2s. 6d.

RHODODENDRONS, with buds. 2s., 2s. 6d. to 5s.

SPIRÆA ANTH. WATERER (lively red flowers). 1/6

SPIRÆA VAN HOUTTEI, white flowers. 2s.

STAPHYLEA COLCHICA, very strong, well budded. 2s. 6d. and 3s. 6d.

VIBURNUM OPULUS, standards. 2s. 6d. and 3s. 6d.

VIBURNUM OPULUS SNOWBALL, fully budded, 1½ feet. 2s. 6d.

VIBURNUM PLICATUM, JAPAN SNOWBALL, 1½ to 2 feet, with buds. 2s. 6d. and 3s. 6d.

WEIGELIA EVA RATHKE, red. 2s. 6d.

WEIGELIA HORTENSIS NIVEA, white. 2s. 6d.

WEIGELIA ROSEA, pink. 1s. 6d. and 2s. 6d.

WISTARIA SINENSIS (*Glycine sinensis*). 2s. 6d., 3s. 6d. and 5s.

CANNELLS' COLLECTIONS OF BULBS.

All Orders from the United Kingdom for Bulbs, such as Hyacinths, Tulips, Crocus, &c., of the value of 10/- or more will be sent Carriage Paid by Post or Rail, according to the weight. Parcels of Bulbs, and Miscellaneous Roots (not Plants), will also be sent Free by Rail when of the value of £1 and upwards.

Only when Orders are PREPAID do we forward COLLECTIONS, CARRIAGE PAID.

For GREENHOUSE DECORATION, FORCING, &c.

COLLECTION A., price 21s., contains over 300 selected Bulbs:

12 Hyacinths, choice named	3 Daffodil obvallaris	6 Tulip, Double, Tournesol, red and
12 Do. white Roman	3 Do. Horsfieldi	50 Crocus, choice named [yellow]
6 Polyanthus Narcissus, paper white	3 Do. Sir Watkins	24 Scilla siberica
6 Do. do. Soleil d'Or	3 Do. telamonius plenus	50 Snowdrops, Galanthus Elwesi
6 Begonias (Tuberous), mixed	12 Do. poeticus	12 Chionodoxa Luciliae
2 Cyclamen	6 Tulip, Single, Duc Van Thol	12 Do. Sardensis
25 Jonquils, sweet-scented	18 Do. do. in 6 varieties	12 Allium Neapolitanum
3 Daffodil princeps	6 Do. Double, La Candeur	12 Freesias.

COLLECTION B., price 10s. 6d., contains half the quantity of the above
21s. collection, selected Bulbs.

COLLECTION C., price 7s. 6d., contains a good assortment of selected Bulbs.

Collections of selected Flowering Bulbs, equally as liberal in
assortment, for 42s., 63s., 84s. and 105s.

H. Cannell & Sons' Bulb Catalogue.

For GROWING IN POTS, VASES, &c.

COLLECTION D., 21s., contains 310 selected Flowering Bulbs:

10 Allium Neapolitanum	6 Hyacinths, White Roman	12 Scilla siberica
12 Chionodoxa Luciliae	6 Iris pavonia	36 Snowdrops, large
100 Crocus, fine named	6 Ixias, fine mixed	12 Triteleia uniflora
6 Daffodils, double	12 Jonquils, sweet-scented	12 Tulips, Duc Van Thol
6 Freesia refracta alba	12 Narcissus, choice, for pots	24 Do. early, four sorts
20 Hyacinths, fine named	12 Polyanthus Narcissus, fine mixed	6 Do. Tournesol, double.

COLLECTION E., price 10s. 6d., contains half the quantity of the above 21s. collection.

Collections of selected Flowering Bulbs, equally as liberal in assortment, for 42s., 63s., 84s. and 105s.

For BEDS, BORDERS, &c.

COLLECTION F., price 21s., contains 700 selected Flowering Bulbs:

12 Allium Moly, yellow	12 Iris, English	12 Scillas
18 Anemones, fine double mixed	25 Do. Spanish, mixed	100 Snowdrops, double and single
24 Do. do. single do.	6 Narcissus, Polyanthus	12 Star of Bethlehem
12 Chionodoxa	12 Do. princeps	12 Tritelcia uniflora
200 Crocus, in four choice varieties	12 Do. double white	25 Tulips, early double, mixed
2 Crown Imperials	25 Do. poeticus	25 Do. single, mixed
30 Hyacinths, choice mixed	25 Do. mixed	25 Winter Aconites.
12 Do. Grape	25 Ranunculus, Persian, mixed	
12 Do. Wood, mixed	25 Do. Turban, mixed	

COLLECTION G., price 15s., contains 424 selected Bulbs:

12 Allium Moly, yellow	12 Iris, Spanish	12 Scillas
12 Anemones, fine mixed	18 Narcissus, various	50 Snowdrops
6 Chionodoxa	12 Do. poeticus	18 Tulips, double, mixed
150 Crocus, choice varieties	6 Do. double yellow	18 Do. single, mixed
18 Hyacinths, choice mixed	6 Do. Polyanthus	12 Triteleia uniflora
12 Do. Grape	25 Ranunculus Turban. mixed	25 Winter Aconites.

COLLECTION H., price 10s. 6d., contains 358 selected Bulbs:

12 Anemones, mixed	6 Scillas	10 Star of Bethlehem
100 Crocus do.	12 Narcissus poeticus	6 Tulips, Duc Van Thol
25 Daffodils do.	12 Do. mixed	24 Do. single, mixed
12 Hyacinths do.	25 Ranunculus, mixed	12 Do. double do.
10 Do. Grape	50 Snowdrops	30 Winter Aconites.

COLLECTION I., price 7s. 6d., contains 221 selected Bulbs:

12 Anemones, mixed	6 Narcissus poeticus	12 Star of Bethlehem
50 Crocns do.	12 Do. mixed	36 Snowdrops
9 Hyacinths do.	18 Ranunculus, mixed	24 Tulips, mixed
6 Do. Grape	6 Scillas	24 Winter Aconites.
6 Iris, Spanish		

FOR BEDS, BORDERS, &c.—continued.

COLLECTION J., price 5s., contains 138 selected Bulbs:

12 Anemones, mixed	6 Iris	24 Snowdrops
36 Crocus do.	12 Narcissus, mixed	18 Tulips, mixed
6 Hyacinths do.	12 Ranunculus, mixed	12 Winter Aconites.

COLLECTION K., price 21s., contains 900 selected Flowering Bulbs,
suitable for naturalizing in the Wild Garden, Orchard, &c.

24 Allium Neapolitanum	12 Fritillarias	24 Ranunculus
50 Anemones, mixed	24 Hyacinths, Grape	24 Scilla campanulata
20 Do. Wood, various	20 Do. Wood	50 Snowdrops, double and single
200 Crocus, mixed	12 Do. mixed colours	50 Star of Bethlehem
6 Crown Imperials	60 Iris, mixed	24 Summer Snowflake
150 Daffodils and Narcissus, in ten named kinds	24 Jouquils	24 Tulips, Cottage, mixed
24 Dog's-Tooth Violets	4 Lilium candidum	24 Triteleia uniflora
		50 Winter Aconites.

Half the above quantity for 10s. 6d.

As the Season advances the foregoing collections are subject to slight alterations.

For Collections of Hyacinths for Pots, Glasses and Exhibition, see page 9.

Collections of selected Flowering Bulbs, equally as liberal in assortment for the Flower Garden, for 42s., 63s., 84s. and 105s.

CULTURE OF THE HYACINTH.

 YACINTHS IN POTS.—Good rich light soil, rich loam full of fibre, well-decayed cow manure, one-quarter of each, and the remainder of leaf-mould and sea-sand in equal proportions. To stand a month or more before being required. Five-inch pots are a good size to use, although smaller will do. In potting, leave the top of the bulb level with the surface of the soil, which should be moderately moist, and should not be pressed too firmly. After potting place them on a bed of ashes, cocoa-nut fibre refuse, tan, or coarse sand, and cover them with the same material to a depth of four or five inches. When well rooted, which will be in about four weeks, they may be removed to a cold pit or frame, and thence to the forcing house as required; but care should always be taken that the bulbs are well rooted before beginning to force them; if not the result is sure to be unsatisfactory.

The best time for planting the general collection is in October, but for early forcing a batch may be planted in September. To keep the foliage dwarf, and perfect the colouring of the flowers, Hyacinths when growing should have a liberal supply of manure-water, plenty of air, and be kept as near the glass as possible. A slight shade during the time of flowering will lengthen the period of blooming.

HYACINTHS IN BEDS OR BORDERS should be planted during the latter part of October or beginning of November, and even up to the end of January, in light rich soil, which should previously be dug to a depth of eighteen inches, an addition of sharp sand being recommended if the soil is very heavy. The bulbs may be planted about six inches apart, and from four to five inches deep. A slight covering of small litter may be used with advantage in very exposed situations as a protection against severe weather.

HYACINTHS IN WATER.—The single varieties are more generally used for this purpose, as they produce finer spikes of bloom than the double. Fill the glasses so as almost to touch the base of the bulb with clear rain-water, putting a small piece or two of charcoal in each glass, as this is of service in keeping the water pure, and gives some slight nourishment to the roots. After having filled the glasses they should be placed in a cold dry place for a month or more till the roots nearly touch the bottom of the glass, when they may be brought gradually to the light, afterwards giving them plenty of light and air, but avoiding all draughts. Attention is required from time to time to keep a sufficient supply of water in the glass, and in looking over the bulbs while growing, to brush off any fungus or decayed skin that may be on the roots of the bulbs. The water does not require changing unless it begins to smell offensive, or the roots assume an unhealthy appearance. When of sufficient height, the flowers should be supported by wire to prevent them overbalancing.

CANNELL'S FINEST NAMED SINGLE HYACINTHS.

It should be distinctly understood that it is not always the largest bulbs that give the best or finest flowers, as in many cases some of the extra good kinds have only medium-sized bulbs, and do not influence the development of the flower spikes.

SINGLE RED.

With their Various Shades.

Best Exhibition Varieties marked thus (+). If required for growing in Water, Moss, or Fibre, those marked thus (*) are most suitable.

EARLY ROMAN HYACINTHS.

For Forcing—Specially Selected Bulbs.

It has been found advisable for all bulbs of Roman Hyacinths to be potted or planted in boxes soon after their arrival, as they are more liable to deteriorate than other kinds of Hyacinths.

Less quantities than 50 of a sort will be charged per dozen.

CROCUS SPECIES.

The following are some of the most valuable of bulbs to the lover of hardy plants, forming as they do an almost unbroken chain from September to April. Our object, however, is mainly to supply those varieties which flower after the last of ordinary flowers have disappeared.

Those marked a, autumn-flowering, s, spring; w, winter.

POLYANTHUS NARCISSI.

(*Tazetta or Bunch-Flowered.*)

Easily cultivated, requiring about the same treatment as the Hyacinth when grown in pots, or they may be planted outdoors, the same as Tulips or the Common Daffodils. All the following varieties will force well, and are invaluable for supplying cut flowers in the Spring; very free flowering and beautifully scented.

CHINESE SACRED LILY (*Narcissus Tazetta*).

DIRECTIONS FOR CULTURE IN BOWLS OR VASES.

The bowl should be filled within half an inch of the top with clean pebbles mixed with a few pieces of charcoal; into this plant the bulbs, and then fill the bowl with water just covering the pebbles, and add more from time to time as it evaporates or is absorbed. (Our Specially Prepared Fertiliser Fibre and Charcoal may be used instead of pebbles, if preferred.)

Keep in a sunny window by day and on a table near the centre of the room by night, as *frost destroys the flower buds*. The plants should not be kept in a room while gas is being burnt, as a *too dry atmospheric shrivels up the flower buds*; a draughty situation must also be avoided.

The more natural conditions of a warm greenhouse will give the greatest success, and the plants can be removed from thence to the sitting-room when in bloom.

Should the flower stems get drawn and support is necessary, a piece of strong wire or a thin wooden stake may be inserted into the bulb, and the flower stems tied to it.

For pot culture "The Sacred or Good Luck Lily" is admirably adapted, and can be flowered in a gentle moist heat within thirty days after planting, provided abundance of moisture is given.

335 Each, 6d.; per doz., 5s

We have imported a quantity of specially decorated Japanese bowls, as used in Japan for the cultivation of the Chinese Sacred Lily, which we can supply at the following prices so long as unsold.

336 1 bowl for 1 bulb, price 1s. 3d.	339 1 bowl for 4 bulbs, price 2s. 6d.
337 1 " 2 " , 1s. 9d.	340 1 " 6 " , 3s. 0d.
338 1 " 3 " , 2s. 0d.	

N.B.—The Chinese Sacred Lily sometimes produces double flowers.

BORDER NARCISSI or DAFFODILS.

Theee, like all other floweres we offer for eale, we grow in large quantities, and grow them well; during their season of blooming they present a magnificent sight, and we beg all loveres either to inspect our stock of Bulbs or when in flower. The following and many other varietees will be objects of great beauty, and probably as good as can be seen at any exhibition. Like the Polyanthus varietees, bloom of all the following are indispeneable for cut flowers, and considering they will grow to perfection in almost any soil and any situation, with little or no attention after planting, and the cheapness of most varietees, they should be found in every garden.

Group I.—MAGNI-CORONATI—(Large Trumpet Daffodils.)

No.		Per doz. s. d.	Each s. d.
341	ACHILLES—Long yellow trumpet, one of the earliest; showy	per 100, 8s. 1 3	0 2

DOUBLE CHRYSANTHEMUM-FLOWERED ANEMONES

These are the finest of all the Double Anemones, and differ from all others by the petals being regularly imbricated like those of the Chrysanthemum-flowered Aster. The flowers are large, extra double, and are produced in great profusion from February until June; no other spring plants can compete with such a gorgeous display of brilliant flowers.

They are quite hardy and easily cultivated; the treatment of the ordinary double Anemone suits them well.

Of great value for forcing, for cut flowers, and for bedding; if planted in succession they can be had in bloom nearly all the year round.

449 In Fine Mixture containing many beautiful varieties, per doz., 1s. 4d.; per 100, 9s.

ANEMONE FULGENS. (Scarlet Windflower).

CHIONODOXA.

No.

474 LUCILIAE (Glory of the Snow)—One of the most beautiful of spring flowering plants, perfectly hardy, and of easy culture. Its beautiful spikes of neat sky-blue flowers, with distinct white eyes and dwarf habit, produce a pleasing effect, and make them visible at a great distance.

Collected roots, 8d. per doz.; 4s. 6d. per 100.

475 GIGANTEA (*syn. grandiflora*)—Very large blooms, fine. 10d. per doz.; 5s. per 100.

476 SARDENSIS—Darker blue than *Luciliae*, with a small white eye. 6d. per doz.; 3s. 6d. per 100.

For all grass land, Narcissi and any or all Spring Bulbs should be planted as per engraving, marked out with chalk; then the whole can be viewed with much enjoyment.

The following are specially suitable for this purpose, and we shall be pleased to send special quotations for planting sizes.

WOOD ANEMONES—Apennina, Blanda, and Nemorosa varieties. See page 18.

ALLIUMS—Moly and Neapolitanum. See page 29.

ORNITHOGALUM—See page 29.

TULIPS—May-flowering varieties. See page 10.

WOOD HYACINTHS—See page 26.

FRITILLARIA MELEAGRIS—See page 20.

DOG'S TOOTH VIOLETS—See page 19.

CROCUS—See page 12.

CHIONODOXA—See page 19.

SCILLAS—Early Flowering. See page 26.

MUSCARI—See page 29.

DAFFODILS—All Daffodils may be planted in grass with success. See page 14.

We strongly advise cutting the grass as late in September as possible, to ensure its being short at the time the bulbs flower.

GLADIOLI (Autumn Flowering).

Ready for delivery in November.

524 New *Gladiolus Childsi AMERICA.*

A beautiful soft flesh-pink, very light and much like *Enchantress* Carnation, except slightly tinged with lavender which gives it the delicate colouring of the most beautiful Lelias. Flowering Bulbs, 6d. each; 5s. per doz.

				Per 100. s. d.	Per doz. s. d.
525	SNOW WHITE	—the flowers are large and well formed and have a paper-whiteness and great stoutness of substance, and last a remarkable length of time when cut; each flower will therefore be available for wreath and bouquet making. The later flowers are sometimes slightly flushed with pink, but if at any season the spikes are cut when the first three or four flowers are open, and are allowed to develop in water, it is positively snow-white, each, 1s. 6d.	—	—	—

				10 6	1 6
526	GANDAVENSIS	mixed hybrids, equal to many named varieties	—

IRIS.

The value of this large and important group of hardy plants is now more generally recognised, and if their accommodating disposition with regard to soil and situation, the rich and varied colours of their flowers, rivalling in this respect the choicest of Orchids, their value as cut flowers for decoration, and if the extended season of their blooming, viz., from Christmas to August, &c., are taken into consideration, it must be admitted that no collection of hardy plants can have any claim to be considered a representative one which does not include a judicious selection of these plants.

BULBOUS AND TUBEROUS-ROOTED SPECIES.

No.

545 ALATA (*Scorpioides*)—Pale blue, conspicuous yellow crest, broad foliage, flowering mid-winter and early spring, fine for pots. 3d. each; 2s. per doz.

546 CAUCASICA—Greenish yellow, silver-margined foliage. 6d. each; 5s. per doz.

547 DANFORDIAE—Bright golden yellow, dwarf, early, fine for pots. 6d. each; 5s. 6d. per doz.

548 HISTRIO—Bright blue, blotched golden yellow, beautiful, early. 5d. each; 4s. per doz.

549 HISTRIOIDES—Large, bright blue, beautiful markings, early. 6d. each; 4s. per doz.

550 JUNCEA—Lovely golden yellow, fine for cutting. 3d. each; 2s. per doz.

551 LUSITANICA—Golden yellow, beautiful, tall and stately. 3d. each; 2s. per doz.

552 ORCHIOIDES—Golden yellow, conspicuous black spots, beautiful. 1s. 3d. each.

553 PAVONIA (The Peacock Iris)—White, blotched clear celestial blue, fine, and well adapted for pots. 8d. per doz.; 4s. per doz.

554 PERSICA—White suffused light blue, blotched purple and gold, sweet scented, dwarf spring flowering, forces readily. 9d. each; 8s. per doz.

No.

555 PERSICA PURPUREA—A most beautiful variety, a showy violet-purple; early spring. 1s. each; 10s. 6d. per doz.

556 PERSICA TAURI—Rich violet-purple, spotted white, golden yellow crest, quite hardy, free, and lasts a long time. 1s. each.

557 RETICULATA—Brilliant deep violet, blotched golden yellow, sweet scented, of exquisite beauty, easily forced, and a gem for pots. 4d. each; 3s. 6d. per doz.

558 RETICULATA KRELAGEI—Claret-purple, blotched golden yellow, sweet scented. 4d. each; 3s. 6d. per doz.

559 SINDJARENSIS—Large blue flowers from the axils of the leaves, strong growing. 6d. each; 4s. 6d. per doz.

560 STYLOSA (*Unguicularis*)—Lovely blue, golden bands and blotches, sweet scented; useful for the greenhouse during the winter. 6d. each; 5s. per dozen.

561 STYLOSA ALBA—Ivory-white, large flower; a gem. 9d. each; 7s. 6d. per doz.

562 TINGITANA—Very robust, fine blue and yellow. 4d. each; 3s. 6d. per doz.

563 TUBEROSA (Snake's Head Iris)—Very early, large and fantastic flower, velvety black and green; a pretty pot plant. 2d. each; 10d. per doz.; 5s. per 100.

ONCOCYCLUS AND REGELIA (Cushion Iris).

No.

564 EGGERI—Handsome and very dwarf, dark blackish chestnut, yellow beard. 1s. 6d. each.

565 GATESII—The largest and most brilliant known at present, flowers rosy grey, thickly spotted with a deeper colour; robust, 2½ ft. 4s. 6d. each.

566 IBERICA—Very dwarf, satiny white, crimson, purple and black spots; fine for pots. 4d. each ; 3s. 9d. per doz.

567 LORTETI—Similar to *Susiana* but with rose-coloured markings, of great beauty. 3s. each.

No.

568 NIGRICANS (The Black Iris)—Velvety purplish black, very distinct. 6d. each ; 5s. per doz.

569 SAARI NAZARENsis (Biemarckiana)—Blooms as large as *Susiana*, falls ash colour, dark veined, standards blue, black veins. 5d. each ; 4s. 6d. per doz.

570 SUSIANA (The Mourning Iris)—2 ft. high, and produces in April, flowers of immense size, of a fine greyish blue richly netted with dark lines, fine for pots, and when in flower a noble ornament for the conservatory. 6d. each ; 5s. 6d. per doz.

SI BERIAN IRIS.

These immediately succeed the German Iris, and flower in June and July.

571 ORIENTALIS (syn. *Sanguinea*)—Closely allied to *Sibirica*, flowers rich velvety blue ; one of the most beautiful Iris in cultivation. 4d. each ; 3s. 6d. per doz.

572 SIBIRICA—S and F, light blue, beautifully netted. 4d. each ; 3s. 6d. per dozen.

573 SIBIRICA ALBA—Pure white, slightly veined. 4d. each 3s. 6d. per dozen.

574 SIBIRICA ACUTA—S and F, deep blue, very dwarf. 6d. each ; 4s. per dozen.

575 SIBIRICA LACTEA—S and F, creamy white, free bloomer. 9d. each ; 7s. 6d. per dozen.

SPANISH IRIS (I. Hispanica).

Our beds of these have been a great surprise ; many declare they are quite equal to Cattleyas, particularly the blue and purple, and their beauty is not excelled by any other hardy bulbous plant.

576 100 in 25 selected named varieties	3s. 6d.
577 50 in 10 choice named varieties	2s.
578 25 in 5 choice named varieties	1s. 6d.
579 Choice mixed	4d. per dozen ; 1s. 9d. per 100.	

ENGLISH IRIS (I. Anglica).

Differing mainly from the Spanish by their bolder habit and later blooming qualities ; also having various shades of white, lilac, rose, blue, and purple, and often striped in the most fantastic manner.

580 100 in 25 selected named varieties	12s. 6d.

587 50	18s.
588 100 in 25 good distinct varieties	30s.

KÆMPFERI (*Lævigata*) or JAPANESE CLEMATIS IRIS

The members of this group produce large flat flowers from 6 to 8 inches in diameter. The prevailing colours are white, magenta, crimson, rose, lavender, purple, violet, and blue, with a brilliant yellow or orange blotch. They complete the succession of bloom by flowering in July and August.

No.	589 12 in 12 choice varieties	7s. 6d.
	590 Fine mixed, strong plants	6d. each ; 4s. per dozen.

IXIAS (African Corn Lily).

These charming little flowers are freely produced in all shades of colour, and are valuable for cut flowers or bouquets in early summer. They thrive best planted in autumn in light rich sandy soil about five in a 5-inch pot, and grown on as a half-hardy plant, when they will flower in May. They succeed fairly well out-of-doors, but must be planted deeply to be safe from frost. The following varieties are all very showy, and our choice mixture contains many lovely tints.

591 CHOICE MIXED	per 100, 3s. ; per doz., 6d.
592 50 in 10 varieties	4s. 6d.		593 25 in 5 varieties	2s. 6d.		594 12 in 4 varieties	1s. 4d.

RANUNCULUS.

The three following groups of Ranunculi stand unrivalled among hardy plants for beauty of form, richness of colour, and distinctness of marking. They should be planted from December to March in any ordinary moist soil.

These are preferable to the Persian and Turban where cut flowers are wanted in quantity, on account of their large flowers and brilliant colours.

DOUBLE FRENCH VARIETIES (Giant).

FREESIAS.

Highly prized for the delightful fragrance of their large and delicately coloured flowers, which, when cut, last in water for a long time. They are easily grown in the greenhouse, and by successional plantings may be had in bloom from January to June. Out-of-doors similar treatment to that for Ixias will suffice.

No.	Each.	Per doz.

715 FINEST MIXED	5s. 0d.	— 0 9

Special quotations for large quantities on application. Seed, best mixed, 6d. & 1s. per packet.

SPARAXIS (*Natal Butterfly Flower*).

Resembling *Ixias*, and requiring the same culture, but preceding them in time of flowering.

716 CHOICE MIXED, per 100, 3s.; per doz., 6d.

717 50 in 10 varieties, 3s. | 718 25 in 5 varieties, 1s. 9d.

TIGRIDIA (Ferraria). *(Mexican Tiger or Iris Lily).*

TIGRIDIA PAVONIA GRANDIFLOBA.

Natives of Mexico, producing flowers of exquisite beauty and singularly curious shape, the colour of each variety is gorgeous and finely contrasted; they bloom from July to October. Before the frost take up the bulbs, and keep in a dry place until the time of planting in March or April. The following are the most distinct and beautiful varieties:—

Ready for delivery in November.

No.

719 CONCHIFLORA—Orange and golden yellow, spotted with dark crimson. 1s. 6d. per doz.; 10s. per 100.

720 GRANDIFLORA AUREA—Deep golden yellow. 2s. 6d.
per doz.; 18s. per 100.

721 GRANDIFLORA LILACEA—A valuable and distinct variety, purplish lilac, with white and purplish spots in centre. 1s. 9d. per doz; 12s. per 100.

722 PAVONIA—Rich scarlet, tinged and spotted with yellow.
1s. 6d. per doz; 10s. per 100.

728 PAVONIA GRANDIFLORA—Is most beautiful when the bloom unfolds itself in the moruing; from June until the frost sets in, no flower so gorgeous or pretty was ever seen, but as the sun sets the flower ceases to exist, and the quantity produced is enormous. 1s. 6d. per doz; 10s. 6d. per 100.

724 PAVONIA GRANDIFLORA ALBA—Large ivory-white flowers, spotted with maroon and rosy lake in the centre, most beautiful when the bloom unfolds itself in the morning; a distinct and useful variety. 1s. 9d. per doz.; 12s. per 100.

725 MIXED. 1s. 3d. per doz.; 8s. 6d. per 100.

TRITONIA.

An elegant group resembling small Gladioli; can be cultivated the same as Ixias.

726 Choice mixed, per 100, 5s. 6d.; per doz., 10d.

TROPÆOLUMS.

No.		Each - s. d.
727	A Z U R E U M — Deep violet-blue, white centre, beautiful	2 0
728	PENTAPHYLLUM — Red and green, 1s. 6d.; extra strong	2 0
729	POLYPHYLLUM — Pale yellow, per doz., 7s. 6d.	0 8

No.		Each—s. d.
730	SPECIOSUM—Crimson, fine, hardy,	per doz. 5s. 6d. 0 6
731	TUBEROSUM—Bears in summer a profusion of yellow and scarlet flowers; very suitable for creeping over rockeries,	per doz. 2s. 6d. 0 3

TUBEROSES.

AMERICAN TUBEROSE.

All who have our Tubers at once exclaim, "I have had nothing like them before!" The fact is we are large growers, and the secret is they are grown especially for us in a spot most congenial, which makes them unequalled in England.

CULTURAL DIRECTIONS.—Pot into 60°e, place in 65° temperature bottom heat, keep moist until roots have made a growth, then increase the temperature to 80°. When full of roots re-pot into 6-inch pots, and place near the glass; after bloom spike appears, place them in a cooler house, train up under the glass. They must be well syringed, and amply supplied with liquid manure.

732 AMERICAN TUBEROSE (Double)—

For choicest Button-hole Bouquets, &c., no other flowers are of more value at all seasons than the Tuberose, and should be used in succession in every forcing-house during the winter.

2s. per dozen ; 12s. per 100. *For delivery about Christmas.*

733 AFRICAN TUBEROSE (Double)—

Direct from the Cape; can highly recommend them.

2s. 6d. per dozen ; 17s. 6d. per 100.

We keep up a succession of flowers all the year. Blooms sent regularly by post to all parts.

Vallota purpurea
(The Great Scarborough Lily).

734 This is the grandest and most general favourite of all bulbs.

Plants of easy growth, flowering bulbs, 9d. and 1s. each; 8s. and 10s. per dozen.

VALLOTA PURPUREA.

Winter Aconite

(*Eranthis*).

735 HYEMALIS—Beautiful golden yellow flowers, light green foliage, very early; useful for naturalising in grass. Per 100, 2s. 6d.; per dozen, 6d.

779	WATSONIA IRIDIFOLIA ARDERNEI —Awarded a F.C.C. R.H.S. at the Chester Show, the Silver Medal at Shropshire. This grand bulbous plant, which in habit much resembles the Gladiolus, throws up strong branching flower stems three to four feet high, carrying from 50 to 100 flowers, which are of the purest white and fine size and shape, in fact much resembling a gigantic white Freesia. It is a lovely plant, and one we have every confidence in recommending. It is best started in a greenhouse in April and then planted out in June, though in warm districts it may be planted outside, or may be treated as a greenhouse plant entirely. Large well-ripened bulbs specially cultivated in Africa. Potted at intervals a succession of bloom may be kept up. Fine strong bulbs

HYACINTH GLASSES.**"The PERFECTION." Latest Novelty.**

In White, Blue, Amber, Green, and Figured	...	each, 1s. 6d.; per doz., 16s. 6d.
Ruby and Figured	...	," 2s. od.; ,," 22s. od.

THE MOST USEFUL HYACINTH GLASSES (SCHMIDT'S PATENT).

In order to ensure success in growing Hyacinths in glasses a renewal of the water and cleaning of the glasses now and then is of great importance. Hitherto both could not be accomplished without pulling out the bulb, doing more or less injury to the tender roots, and other inconveniences. The new patent Glasses effectually remove all difficulty, and have the advantage of being both convenient and comparatively cheap. The tube contains the bulbs with the roots, and is simply lifted up and put aside without touching the bulbs at all. The container may then be easily cleaned and filled with fresh water.

White, Blue, Plum, and Green ... 1s. each; 10s. per dozen.

HYACINTH SUPPORTS (WIRE), 4s. 6d. PER DOZEN.

All who use our Seeds at once pronounce them superior, not only in size but plumpness and colour. Coming off our rich warm calcareous land, they produce nearly double the weight of the ordinary seeds on other soils. The great success that has attended this department (grown and supplied direct from us—the growers to the sowers) makes us proud of our registered Trade Mark, "PERFECT GOLDEN SEEDS."

ROSES.

Ten Acres—Thousands in Pots.

PRICES OF ROSES.

WHEN THE SELECTION IS LEFT TO US.

Standards and Half-Standards, best sorts and well varied, 18s. to 24s. per doz.

Dwarfs on the Briar; Extra Strong Good varieties, 9s. per doz., 70s. per 100.

Dwarf Teas, Varieties from the Open Ground, 12s. and 15s. per doz.

Extra Fine Plants, in Pots, 18s. 24s. and 30s. per doz.

Hybrid Perpetuals, in Pots, Good Strong Plants, 18s. per doz.

Customers selecting their own are respectfully requested to add to their orders a few supplementary sorts, lest by previous orders the stock of any particular variety should be exhausted, this being especially necessary late in the season.

 Another secret in getting Roses to grow after removal, particularly Standards, is to prune well back and plant early in October, or as soon in November as possible. February and March are the best Spring months. By so doing, young fibres are made at once, before the cold or hot weather sets in, whereas, if planted later in the usual way, they must stand without nourishment until the return of the season.

Showing our complete system and mode of packing—roots protected and moist, just as if they were in the ground. It will be observed that there are Standards (in centre), Climbers, &c.

ROSES FOR FORCING.

A Large Quantity of all the Best Kinds kept in Pots, our selection, 18s., 24s. and 32s. per dozen.

Also a quantity of Standards, in Pots, for removing at any season; a List of kinds sent on application.

A great quantity of well-rooted Dwarf Roses on their own roots in pots; a List of sorts on application.

Seedling Briars and Cuttings, 6s. per 100.

A GRAND NEW HARDY CLIMBING PERGOLA ROSE, AMERICAN PILLAR.

AMERICAN PILLAR, as its name indicates, belongs to the Pillar section of Roses, and can be classed with the *Jeannie Deans* type, but in every way it is a decided improvement. The flowers are large and often measure four inches across, of a most fascinating and chaste rosy pink colour, with a broad band of white at the base of florets, while in the centre of each blossom is a large cluster of bright yellow stamens. It throws enormous trusses, and as soon as one bloom becomes exhausted there is always another ready to take its place and continue in bloom for fully six weeks; one of the chief characteristics of *American Pillar* is that it will stand the rain, wind and sun, and does not spot or become disfigured. When other Single Roses are looking an object of misery after a storm, this novelty will be found as fresh as a daisy. It has an extraordinary constitution, thriving in poor soil, as well as in rich, and making shoots from 10 to 15 ft. long in one season. In fact, it is more robust than the old common Dog Rose, it has stout, thick pendula branches, rather thorny, but furnished with an abundance of glossy dark green leaves, each stem having nine leaflets instead of the usual seven or five, which gives the bush a very rich effect, and so far as our experience goes it is immune from mildew and insects. Both for Pergolas and for forcing purposes it has no rival in Single Roses. A gem of the first water, it can be sent and carried any distance under ordinary conditions, and with no apparent injury. It needs no gumming. The blooms are carried erect on stiff stems, and in a cut state they are highly decorative and attractive. We predict a great future for this variety, and anticipate it will be sought after as much and probably more so than that grand old *Crimson Rambler*. For Pergolas, Arches, &c., it stands right out owing to its remarkable distinctness; it captivates the eye at once, and causes one to exclaim: "Whatever can that lovely mass of colour be?" It is truly a grand addition to our garden scenery.

Plants in Pots, 4s. each; larger, 6s. and 7s. 6d. each.

All our Roses are kept thoroughly free from Insects and Mildew by using a Sprayer and our "One and Only Perfect Wash" (see Engraving). Consequently double the quantity of fine buds are obtained from our plants than from those usually grown.

All other plants subject to pests show the same distinct brightness and healthy growth.

NEW ROSES.

All other New Roses supplied at Advertised Prices.

BETTY—Hybrid Tea, coppery rose, shaded golden yellow, large half-full flowers, Gold Medal, N.R.S. 2s.

CLIMBING FRAU KARL DRUSCHKI—Hybrid Perpetual, a climbing form of the well-known variety of same name. 2s.

COLONEL S. R. WILLIAMSON—Hybrid Tea, satiny white, deep blush centre, blooms large, perfectly formed with high pointed centre, and carried on stout erect stems. 3s. 6d.

COQUINA—Rambler, a single rose, porcelain pink, with yellow base. 2s.

COUNTESS ANNESLEY—Hybrid Tea, rosy salmon, suffused old gold ; large and full. 1s. 6d.

COUNTESS OF GOSFORD—Hybrid Tea, salmon-pink shading to rose-pink, suffused with yellow at the base of petals, large well formed half-full flowers. Gold Medal, N.R.S. 2s.

JEAN HOLE—Hybrid Tea, silvery carmine, shaded salmon ; very large full flowers, with high centre. 1s. 6d.

DOROTHY PAGE ROBERTS—Hybrid Tea, colour coppery-pink suffused with yellow, very large stout petals, half-full flowers ; free blooming decorative variety of great merit. Gold Medal, N.R.S. 3s. 6d.

DR. O'DONEL BROWNE—Hybrid Tea, carmine rose, large, full, and perfectly formed, petals large and shell shaped. 3s. 6d.

ELIZABETH BARNES—Hybrid Tea, satiny salmon-rose, centre fawn suffused yellow ; outside of petals rosy red ; distinct and novel. 3s. 6d.

EVANGELINE—Wichuriana Climber, white, tipped with pink, large single flowers in clusters. 1s. 6d.

FLOWER OF FAIRFIELD—Rambler, brilliant crimson sport from Crimson Rambler. 2s.

FRAU LINA STRASHEIM—Polyantha Climber, salmon-red tinted flesh ; flowers in large clusters. 2s. 6d.

HARRY KIRK—Hybrid Tea, deep sulphur-yellow, lighter at edges of petals, blooms large and full ; a great acquisition to yellow Roses. 3s. 6d.

HIAWATHA—Wichuriana Climber, deep crimson, shading to almost white in the centre of the blooms, with rich golden anthers ; large trusses of single flowers of great beauty. 1s. 6d. to 3s. 6d. each.

HUGO ROLLER—Tea, rich lemon-yellow, petals edged and suffused with crimson ; flowers of medium size, and very freely produced. 3s. 6d.

IRISH ELEGANCE—Hybrid Tea, bronzy orange in the bud, opening to single flowers of various shades of apricot. Gold Medal, N.R.S. 2s.

KONIGIN CAROLA—Hybrid Tea, salmon-rose changing to silvery pink ; a fine *Caroline Testout* type of flower. 1s. 6d.

LADY HELEN VINCENT—Hybrid Tea, pink, reflex of petals pale flush, base of petals veined and suffused with a yellow zone ; beautiful. 3s. 6d.

LOUIS RICARD—Hybrid Perpetual, deep velvety crimson shaded vermillion ; a showy peony-like flower. 1s.

LYON ROSE—Shrimp-pink, with coral-red centre and shaded with chrome yellow, large full and perfectly formed flower. 3s. 6d.

MADAME CONSTANT SOUPERT—Tea, dark golden yellow, strongly tinted peach-pink ; large, full and perfectly formed flowers. 2s. 6d.

MADAME EDMOND SABLAYROLLES—Tea, bright yellow on the outside, centre orange-yellow ; large full flowers, opening well. 2s. 6d.

MARQUISE DE SINETY—Deep orange, shaded fiery red, a good grower. 2s.

M. H. WALSH—Hybrid Perpetual, rich velvety crimson-scarlet, large full flower ; good autumnal. 1s. 6d.

MOLLY SHARMAN CRAWFORD—Tea, very free and vigorous, the blooms large and full, pure white. 3s. 6d.

MRS. AARON WARD—Hybrid Tea, good in shape and colour Indian-yellow, sometimes washes salmon-rose. 2s.

MRS. A. M. KIRKER—Hybrid Perpetual, clear bright cerise, large full flowers ; good autumnal. 2s.

MRS. E. G. HILL—Hybrid Tea, centre white, outside of petals coral-red ; very large full flowers. 2s.

MRS. F. W. FLIGHT—Polyantha Climber, pink flowers with white centre, semi-double, produced in large trusses. 1s. 6d.

MRS. G. W. KERSHAW—Hybrid Tea, deep rose-pink, blooms large and full ; very free flowering. 2s.

MRS. HAROLD BROCKLEBANK—Hybrid Tea, creamy white, centre buff, base of petals golden yellow ; flowers produced on stout erect stems. 3s. 6d.

MRS. ISABELLE MILNER—Hybrid Tea, ivory-white, suffused with pink and margined with mauve, like *Mildred Grant* ; large flowers of perfect circular form. 3s. 6d.

MRS. MYLES KENNEDY—Tea, delicate silvery-white, shaded buff, and pink in centre, large full flowers. Gold Medal, N.R.S. 2s.

MRS. O. G. ORPEN—Climbing Damask, bright rosy pink, with golden anthers, large single flowers produced in fine trusses. Gold Medal, N.R.S. 1s.

MRS. STEWART CLARK—Hybrid Tea, bright cerise, changing to cherry-pink, white at the base of petals ; large full flowers. Gold Medal, N.R.S. 3s. 6d.

MRS. THEODORE ROOSEVELT—Hybrid Tea, creamy white, centre rose, long buds ; large full flowers. 1s. 6d.

MRS. W. COOPER—Hybrid Tea, deep rosy flesh, edged delicate blush, large flowers. 2s.

MY MARYLAND—Hybrid Tea, bright salmon-pink with paler edges, frag ant. 2s.

RHEA REID—Hybrid Tea, a strong grower, flowers deep red. Awarded Medal, R.H.S. 2s.

ROSALIND—Hybrid Musk, bright pink with deeper coloured buds, flowers produced in bunches, particularly good in autumn ; plant of very dwarf bushy habit of growth. 2s.

SNOWSTORM—Hybrid Musk, pure white small flowers produced in bunches ; a perpetual flowering Musk of moderate growth ; good autumnal. 2s. 6d.

SOUVENIR DE STELLA GREY—Tea, the predominating colour is orange, with splashes of yellow, salmon and crimson ; flowers of medium size, perfectly formed and very freely produced. A magnificent decorative variety. 3s. 6d.

SWEETHEART—Wichuriana Climber, pale pink, changing to white ; flowers produced abundantly. 1s.

TAUSENDSCHEIN—Polyantha Climber, pink, turning to bright rose and carmine as the flowers expand ; produced in large clusters ; very free. 2s. 6d.

VEILCHENBLAU—A seedling from *Crimson Rambler*, semi-double, in large bunches of medium size, opening reddish lilac, changing to amethyst and steel blue. 2s. 6d.

WHITE DOROTHY—A pure white sport from the well-known *D. Perkins* ; a most valuable addition to this class. 2s. 6d. to 5s.

WHITE KILLARNEY—Hybrid Tea, pure white bloomed form of the well-known *Killarney*, likely to become a great favourite. 5s.

WILLIAM SHEAN—Hybrid Tea, pure pink, with delicate ochre veination ; very large and perfect form. 2s.

W. R. SMITH—Tea, large full flowers, creamy white, suffused bright rosy pink. 2s.

ROSES

That Bloom from June onwards.

Hybrid Perpetual.

Where H.P. Standards are Priced 2/-, Half-Standards will be 1/6.

In the column of Catalogue describing the habit of growth, the following abbreviations are used:—

VIG.—For vigorous; varieties which produce long vigorous shoots, most of them adapted for Pillar Roses.
 FREE—Varieties which are free growers, making large heads. MOD.—For moderate; varieties forming medium compact heads. The kinds marked thus (*) are of free growth and well suited for planting in the vicinity of large towns. P, those suitable to grow as Pot Roses; F, varieties best suited for forcing; C, climbers.

Those marked * may safely be depended upon for exhibition purposes.

QUEEN MAB mod.	soft rosy apricot, centre shaded orange, outside tinted rose; free ..	1 6
VIRIDIFLORA vig.	The green-flowered rose, petals are green like the foliage ..	0 9

Ayrshire, Boursault, Miscellaneous, and Evergreen Hardy Climbing Roses.

Of great use for covering spaces quickly. All are free bloomers, and carry abundance of large clusters of flowers. May be planted in any situation outdoors, either as climbers, pillars, hedges, or pegging down. All are hardy and vigorous growers; they should be cut back fairly hard the first spring of planting, and afterwards be allowed to grow as they like, except to cut out dead and useless growth.

Name.	Description.	Each—s. d.
ALICE GRAY	white, delicately edged with pink ..	0 9
ALPINA	bright rose, leaves changing colour in autumn ..	0 9
AMADIS	deep purplish crimson ..	0 9

THE GARLAND	nanken and pink, changing to white, flowers in very large clusters ..	0 9
WILLIAM'S EVERGREEN	yellowish white; very free ..	0 9

Wichuriana Roses.

Useful for growing among rockwork, and as creepers for banks ; also good as weepers over arches, pergolas, etc., and for pegging down in beds ; they require no training or pruning after the first spring of planting, and should be allowed to grow over the ground as they like, keeping them clear of all weeds being the only essential thing in their future cultivation.

Name.	Description.	Each—s. d.
ALBERIC BARBIER	creamy white shaded yellow, buds darker yellow, semi-double	... 1 0
AUGUSTE BARBIER	lilac-white, with dark buds, small, semi-double, produced in bunches	1 0
DEBUTANTE	soft pink, double flowers borne in large clusters, sweet scented, very free	1 6
DOROTHY PERKINS	beautiful shell-pink, large clusters of small double blooms, sweetly scented

ESTABLISHED PLANTS, in 6-in pots, of all the finest Tea-scented varieties,
grown especially for Conservatories, 18s., 24s. and upwards per dozen.

STRAWBERRIES.

We respectfully solicit your orders for the finest plants from the most complete and best kept collection in England. Swanley has always been known to be the largest and best Strawberry-growing district in the World.

Seven Acres grown entirely for the Runner Plants all in separate beds, so that every kind shall be true to name.

 THE Strawberry is one of our most important fruits, and should be better understood and grown ; when so, a full crop would be almost a certainty every year. The first and chief aim should be to have three inches of good manure evenly spread on the soil, then well trenched or deeply dug, and turned over the second and even third time, well mixing the manure with the soil ; this should be done not later than July. Then have fine young green plants from us, trim off all the leaves except one or two, place the roots as in Fig. 4, with the crown well above the soil, which tread firmly ; this done, well water them, should the soil or weather be dry, until they get well into growth. Beyond this little else is needed but hoeing until just before the fruit shows colour the following year when the ground should be carefully covered with clean straw ; be careful to place it close up and round the plants ; at all times cut away the runners and the crop will be large. If fine exhibition fruit is required, and the weather is dry, make four or six holes with a crowbar round the plants, and fill up with liquid manure three or four times a week, and the fruit will be much increased in size. The berries must be thinned and none left but those almost sure to come in for exhibition. Always keep them free from weeds. Remove runners as they appear.

The four accompanying illustrations represent, as plainly as a finger post, why and how plants grow, do well, and vice versa.

No. 1 is planted much too deep. No. 2 has its roots rammed and jammed too close together, wants its roots spread. No. 3 is far too much above soil, nearly starved, and the life blown out of it in windy weather. No. 4, being properly and naturally planted in the right way and time, clearly illustrates its far out-growing the others, or in other words, showing right and wrong way of planting. Strawberries planted in August will bear fine large fruit the following year. Fruit will be coming on, all things made sunny, and the garden going on merrily. The great and most essential thing is to well dig and manure the soil ; let it be so done that the manure is well mingled. Soil cannot be too well pulverised. As an instance—in Swanley district the ground for Potatoes is ploughed five times, with the result that we have the best quality of this vegetable in the world. The ploughboy says, "Potatoes must have plenty of crumb." The same remark applies to Strawberries. Hoe an inch of fine dusty soil on the surface, this will keep the under soil moist and the sun out ; they will then withstand any drought. After well preparing the soil, level and roll or tread it, and the planting done with a small spade ; make sure that the roots of the plants inserted are well spread out, press the soil down firmly with the foot until the crown is just above the soil (See No. 4.). This firming should be repeated fortnightly until the plants are well established. Let there be 2 ft. 6in. distance between each row, and 2 ft. from plant to plant. Many of our best growers in Kent will have them 3 ft. apart always, and say, "We must have fine fruit, small fruit never pays." To see what is wanted, and what to avoid, is the art of gardening ; by adopting the above instructions, and applying the same to all gardening operations, the garden will be a greater success and pleasure. Give way to leisure and all will revert to a wilderness. If you want to succeed, let all your garden operations be guided by calmness and good sense ; be collected in everything you undertake, and do all you can to assist and coax Nature, dive deeply into the cause and effect—remedy is often easy if you are anxious—when so, one can hardly be otherwise than successful.

NEW INTRODUCTIONS.

GEORGE MONRO.—The result of a cross between *Royal Sovereign* and *Sir Charles Napier*. It is a prolific bearer, and the fruit is large, resembling *Royal Sovereign* in shape, bright red in colour, firm flesh and exquisite flavour. It ripens a week earlier than *Royal Sovereign*. A splendid early forcing variety, sets freely, and is not subject to mildew. Its bright colour, solid flesh, rich flavour, earliness, and most prolific cropping qualities make it a most valuable acquisition for market purposes, as well as for the private garden. Award of Merit, R.H.S. *Runners from the Open Ground*, 3s. per dozen; 20s. per 100. *Plants in small pots*, 6s. per dozen; 40s. per 100.

LAXTON'S UTILITY (1909).—A seedling from *Waterloo*, and ripens a few days before that variety; beautiful large wedge-shaped fruit of a bright crimson colour, very firm, of richest flavour; a very free cropper and robust grower. Considered to be an improved *Givon's Late Prolific*, as it is a better colour, firmer, and the fruits more even and regular in size. Highly recommended to follow the main crop varieties. *Open Ground Runners*, 6s. per doz.; £2 per 100. *Pot Plants*, 8s. per dozen; £3 per 100.

LAXTON'S RIVAL (1909).—A seedling from *Givon's Late* and *Royal Sovereign*; a late variety, of great cropping qualities, containing all the good points of *Givon's Late* with the colour of *Elton Pine*; the flavour is very fine, sweet and refreshing; the flesh is firm and white throughout. *Open Ground Runners*, 6s. per dozen. *Pot Plants*, £3 per 100.

LAXTON'S EPICURE (1909).—The result of a cross between *British Queen* and *Fillbasket*, both of rich flavour. This seedling has combined in itself a concentration of the best of the flavour of each, a delicious conserve equal to stand the criticism of an epicure. Besides for its exquisite flavour this variety is good for all purposes. *Open Ground Runners*, 5s. per dozen; 30s. per 100. *Pot Plants*, 6s. per dozen; £2 per 100.

LAXTON'S PROFIT (1909).—Recommended to all Strawberry growers as the best mid-season variety introduced for many years. This is a main-crop variety of a dark vermillion-scarlet, conically wedge-shaped; the inside flesh is very firm, enabling the fruit to travel well. A cross between the well-known variety *Sir Joseph Paxton* and *Countess*. *Open Ground Runners*, 6s. per dozen; £2 per 100.

TUCKSWOOD EARLY.—After a careful trial this has proved to be of exceptional merit. The first ripe berries have been picked ten days before *Royal Sovereign*; the fruit is of medium size, of a rich bright scarlet colour, and most attractive in appearance; flavour delicious, and equal to any other in existence; flesh is firm, as hard as a *Paxton*, and as good in colour, a heavy cropper, and exceptionally good for forcing. Must be included in all up-to-date collections, and which will be grown by market growers on account of its productiveness and other good qualities. *Well-rooted Open Ground Runners*, 3s. per dozen; 20s. per 100.

H. Cannell & Sons' Strawberry List.

NEW INTRODUCTIONS—continued.

LAXTON'S CROPPER.—Raised by crossing a promising second generation seedling \times *Fillbasket*. Raiser's description:—"May best be described as a much improved *Fillbasket*. In the cross we have succeeded in maintaining the heavy cropping qualities of *Fillbasket*, but have increased the size, colour and flavour largely in all three respects. Everyone who has grown Laxton's *Fillbasket* will admit that it is the heaviest cropping variety in commerce, but is somewhat small and rather light in colour. Laxton's *Cropper* is a main crop variety of a rich crimson colour, bluntly conical in shape, the flesh is white and solid with a good firm exterior skin, very rich and luscious in flavour, medium to large in size, with a fine constitution, succeeding well on almost any soil, and forces well as a second early." *Open Ground Plants*, 4s. per dozen; 20s. per 100. *In pots*, 5s. per dozen; 30s. per 100.

LAXTON'S RELIANCE.—Raised by crossing that fine variety *Vicomtesse H. de Thury* \times a selected seedling of the *St. Joseph* perpetual type. Raiser's description:—"A mid-season fruit of very heavy cropping qualities, of large size, rich flavour, bright scarlet in colour, conically wedge shape. This variety, combining as it does many of the best qualities of *Vicomtesse*, by much increased size, can be highly recommended as a main crop variety. Where quality is a desideratum combined with size, vigour and cropping qualities, we have every confidence in recommending this variety. It is one likely to succeed on almost any soil. The flesh is firm and solid, enabling the fruit to travel well." *Open Ground Plants*, 4s. per dozen; 20s. per 100. *In pots*, 5s. per dozen; 30s. per 100.

LAXTON'S PROGRESS.—Raised from *British Queen* and *Latest of All*, will add another to the list of good lates. The flavour is really rich, partaking much of the *Queen* type. The colour is a bright scarlet, with white inside flesh. In size it is very large, of flattish wedge shape; fruit produced in large clusters with bold vigorous foliage. A wonderful grower, and does exceedingly well on almost any soil. The variety is really late, ripening with *Eleanor* and *Waterloo*. *Open Ground Runners*, 2s. per dozen; 10s. per 100. *In pots*, 4s. per dozen; 20s. per 100.

PRESIDENT LOUBET.—Large dark crimson fruit. A seedling from *Waterloo*; a fine late variety. *Runners*, 1s. 6d. per dozen; 7s. 6d. per 100.

LAXTON'S REWARD.—**Grand New Mid-Season Strawberry.**—Award of Merit, Royal Horticultural Society. Raiser's description:—"Handsome new Main Crop variety the result of crossing *Royal Sovereign* and *British Queen*. It may best be described as a greatly improved *President* for size, colour, and flavour. Strongly recommended." *Strong Runners*, 2s. per dozen; 10s. per 100. *In pots*, 4s. per dozen; 20s. per 100.

LAXTON'S BEDFORD CHAMPION.—**Enormous New Second Early Strawberry.**—The result of a compound cross between *Scarlet Queen* and *John Ruskin*, and *Noble* and *Sir J. Paxton*. Raiser's description:—"It therefore contains a mixture of at least four distinct bloods, and it is to this that we attribute the exceptional vigour and size of this variety, for it is without doubt the largest Strawberry placed in commerce. Distinct and vigorous, will grow anywhere, and if for size only will be a notable addition to our list of best varieties." *Strong Runners*, 1s. per dozen; 5s. per 100. *In pots*, 2s. 6d. per dozen; 15s. per 100.

LAXTON'S LATEST.—Raiser's description:—"Without exception the very latest Strawberry to ripen its fruit, and is at least a week later than *Waterloo* and other lates. Raised from a cross between *Latest of All* and a very fine seedling, but entirely distinct. The fruit is very large, conically wedge shaped, very firm fleshed, and exceedingly rich and luscious in flavour, which cannot be said of most of the latest at present in commerce." *Strong Runners*, 1s. per dozen; 5s. per 100. *In pots*, 2s. 6d. per dozen; 15s. per 100.

LAXTON'S THE BEDFORD.—**The Finest Main Crop for Flavour, Appearance, Vigour and Crop.**—Raiser's description:—"A mid-season fruit of exceptional merit, and we have no hesitation in saying it is the best Main Crop we have yet sent out, good alike for the amateur or market grower." *Strong Runners*, 1s. per dozen; 5s. per 100. *In pots*, 2s. 6d. per dozen; 15s. per 100.

GIVON'S LATE PROLIFIC.—It is a cross between *Waterloo* and *Latest of All*, the former being the seed parent. It excels both these varieties, and is a much better doer than either. Vigorous and free-cropping, especially as a yearling plant. Fruits are very large, mostly of a cockscomb shape, of a rich crimson colour, fine flavour. Award of Merit, Royal Horticultural Society. *Ground Runners*, 1s. per dozen; 5s. per 100. *Strong, in small pots*, 2s. per dozen; 15s. per 100.

THE LAXTON.—The fruit stalks being extraordinarily long, the fine dark berries lie out round the plants beyond the leaves in most surprising quantities. Good acid flavour, free and strong, for field growing one of the best. This variety is not recommended for forcing. *Open Ground Plants*, 1s. per dozen; 5s. per 100. *Plants in pots*, 2s. per dozen; 14s. per 100.

SELECT LIST OF OTHER VARIETIES OF STRAWBERRIES.

BICTON PINE—Conical shape, white fruit, distinct, large. 5s. per 100.

BRITISH QUEEN—The best flavoured fruit in cultivation, should be grown in every garden. 5s. per 100.

COMPETITOR—Very large, splendid Strawberry.

COUNTS—A really good old variety, does splendidly in our fields, and produces enormous crops.

DR. HOGG—Similar to *British Queen*, fine variety, should be tried everywhere.

ELTON PINE—One of the best late varieties in cultivation.

FILKBASKET—Late, bright scarlet, white flesh, sweet and luscious, good for early forcing.

KEEN'S SEEDLING—One of the best for forcing and small gardens.

KENTISH FAVOURITE—Early, large fruit ; said to be synonymous with *Leader*. 1s. per dozen ; 5s. per 100.

LATEST OF ALL—As its name denotes, it is several days later than most varieties, free, fruit large ; good cropper.

LAXTON'S CLIMAX—Late, rich flavour, firm and solid, hardy, very prolific.

LAXTON'S No. 1—Very early, an improvement on *Noble*.

LEADER—Mid-season, large and fine, dark crimson flesh, good flavour. 1s. per dozen ; 5s. per 100.

LEO XIII.—Early, fine flavour, good colour, medium size. 5s. per 100.

MONARCH—Second early, large size, good colour, rich flavour. 1s. per dozen ; 5s. per 100.

ROYAL SOVEREIGN—Small Runners, 3s. per 100. Fine Selected Runners, 4s. per 100 ; 20s. per 1,000. Fine plants in small pots, 2s. per dozen ; 15s. per 100. Fruiting Plants in large 5-inch pots, 30s. per 100.

SCARLET QUEEN—Very attractive, *Queen* flavour ; a favourite with many.

SIR J. PAXTON—This is the variety so popular throughout Kent for field and market and also forcing. Special prices for large quantities.

VICOMTESSE H. DE THURY (syn. *Garibaldi*)—Although small, it is one of the best in cultivation to answer all general purposes, soil and climate ; good for first early-forcing crop. 5s. per 100.

WATERLOO—The darkest coloured fruit of any, and for dessert indispeusable. 5s. per 100.

Rooted Runners from fruiting plants, well rooted and picked, 4s. per 100 ; selected, 5s. per 100, except those priced in small pots, to fruit the first season, 12s. to 14s. per 100 ; in 5 and 6-inch pots, for forcing, 25s. to 40s. per 100.

Special Prices per 1,000, 50,000, and 100,000.

Other varieties can also be supplied. Special Prices to the Trade and Market Growers on application. Correspondence invited.

We cut off all fruit trusses of our plants when in flower so as to induce early strong runners and make plants more fruitful ; this alone makes what we supply nearly as good again as in the ordinary way.

PERPETUAL-FRUUITING STRAWBERRIES.

LAXTON'S PERPETUAL—A cross between *Monarch* and *St. Joseph*. Fruit wedge-shape, deep red in colour flesh throughout of the same tint, distinctly sweet and aromatic in flavour, very dwarf and compact in habit, can be planted 18 inches from row to row, blooming and fruiting continuously from June to November. *Open Ground Runners*, 2s. per dozen ; 10s. per 100. *In pots*, 4s. per dozen ; 20s. per 100.

LOUIS GAUTHIER—Fruit of bright pink, large size, and very sweet. *Culture*—Pick off all first fruit and flowers from the old plant, lay out runners, get them well rooted ; and from the first to the second these throw up trusses of fruit, and give a succession all through late summer and early autumn ; useful for forcing. *Open Ground Runners*, 1s. per dozen ; 5s. per 100. *In pots*, 2s. per dozen ; 15s. per 100.

SAINT JOSEPH or RUBICUNDA—The first true perpetual large-fruited Strawberry ever offered. During last season a bounteous crop of splendid fruit was gathered up to October. The flower stems are produced in succession from May to Autumn, and bear fruit, for which some slight support is almost indispensable. The fruit is of good size, dark red in colour (also red inside), solid, firm, very juicy, and of first-rate flavour. Early runners planted separate during summer have also produced a very good crop the same autumn. *Open Ground Runners*, 1s. per dozen ; 5s. per 100. *In pots*, 2s. per dozen ; 15s. per 100.

SAINT ANTOINE DE PADOU.

ST. ANTOINE DE PADOU—The result of a cross of *St. Joseph* and *Royal Sovereign*, and is distinguished from *St. Joseph* most essentially by its more vigorous fruiting stems. The fruit is larger and finer than *St. Joseph*, and of a most excellent flavour, firm, and of good keeping qualities. Improvement on *St. Joseph*. It has also proved to be a good forcing variety. How singular, ripe fruit and flowers on the same truss at one time.

This variety is of great excellence and of the utmost importance as a grand dessert fruit to all who enjoy the lovely and exquisite flavour of *British Queen*, as it not only produces a good crop of ordinary-sized fruit in the usual season but with good watering in dry weather and protecting in wet it throws up trusses of flowers and fruit all the remainder of the season. Mr. Cannell, Seur., looks upon it as the most invaluable continuous summer and autumnal-fruited variety in cultivation. For pots it is most indispensable, but it has unfortunately one fault—that is—its flower and fruit stalk is too short. *Open Ground Runners*, 1s. per dozen; 5s. per 100. *In pots*, 2s. per dozen; 15s. per 100.

We respectfully solicit orders for ours, the finest plants and most complete collection in England. Swanley is the largest and best Strawberry-growing district in the World.

Seven Acres grown entirely for the Runner Plants.

Strawberries, like Potatoes, are always more fruitful when given a change of soil, consequently success depends a good deal on having runners from a purely different soil.

Being located in the midst of thousands of acres of all the best Strawberries and Raspberries enables us to offer fine plants, and good sure cropping kinds at the lowest prices.

Swanley has again this season far excelled all other localities for its quantity and quality of fruit.

WIRE STRAWBERRY SUPPORTS, 2s. per dozen; 10s. per 100.

VIOLETS.

If there is one flower more than another that can lay claim to the honour of being everybody's favourite, it is the Violet; it cheers the most saddened spirits, and gladdens the most robust.

We are pleased to say the hybridisers and the most anxious and hopeful seedling raisers are at work, and to those who present flowers double the size of our present kinds with a perfume, the whole universe owe at least their thanks. Violets, like all other flowers, have their wants, and if these wants are not supplied at the right time they become weak and unsatisfactory. Old plants must be divided early in April, and replanted in good deeply-dug and well-manured soil, sixteen inches from plant to plant for large growers; the double and smaller-leaved kinds, twelve inches, with their roots well down so as not to suffer in dry weather, and at all seasons their runners must be cut off; they will then produce flowers such as are seldom seen.

DOUBLE WHITE VIOLETS.

BELLE DE CHATENAY—Pure white; large and fragrant. 6d. each; 5s. per doz.

SWANLEY WHITE, *syn. COMTE BRAZZA*—A beautiful and useful white form of *Neapolitan*, fragrant, hardy and free; much grown in America, to where we have exported it largely. 9d. each; 6s. per doz.

NEW DOUBLE VIOLETS.

MRS. ARTHUR—Darker, bluer and more useful in every way than *Marie Louise*, and probably the best double Violet ever offered. 9d. each; 6s. per doz.

MRS. D'ARCY—Pale clear mauve; a good grower and quite distinct. 9d. each; 6s. per doz.

DOUBLE VARIETIES.

DE PARME—Pale lavender-purple flowers produced in great abundance; earlier than *Neapolitan*. The finest variety for growing in frames; very free.

KING OF VIOLETS—Dark indigo-blue; very large double flowers; best outdoors.

LADY H. CAMPBELL—Only wants to be once seen and it will be universally grown as a late kind.

MARIE LOUISE—Fine variety; rich mauve-lavender blue, with a white eye; flowers large, and one of the best; a universal favourite.

MDLLE. BERTHA BARRON, *syn. VICTORIA*—A fine, vigorous, compact grower; flowers freely produced, strongly scented, and of a beautiful indigo-blue. 9d. each.

MRS. J. J. ASTOR—Of a pretty shade of pink, very free; distinct. 9d. each.

NEAPOLITAN—Lavender, with a white eye, flowers produced in great abundance, very fragrant; in a cold frame a gem all the winter.

NEW YORK—Mauve-coloured, for size and length of footstalks similar to *Marie Louise*; very fragrant and free.

All those not priced 6d. each, 4s. per doz. from ground; in 5-in. pots, 6s. and 8s. per doz.
Special prices for large quantities.

Rooted little plants, 2s. 6d. per doz., 15s. per 100. Cuttings, 9d. per doz., 5s. per 100

NEW SINGLE VIOLETS.

BARONNE A. DE ROTHSCHILD—Producing splendid large single flowers of a rich purple shade; very fine. 9d. each.

ROSE PERLE—Quite a new colour, and will no doubt be highly valued by every lover of violets. The medium-sized flowers are of a fine satiny rose colour, with white centre, the colour being clear and decided. It does not fail to attract immediate attention. 9d. each.

ST. HELENA—A native of the well-known Island. It is a most profuse bloomer, and its pretty, distinct, light mauve-blue flowers are very striking, particularly when grown beside the dark blue kinds. Should be in every garden—and will one day—as it is a general favourite with all beholders. 9d. each.

SINGLE VARIETIES.

AMIRAL AVELLAN—A grand improvement on *Odorata rubra*, being brighter in colour and stronger in scent.

ARGENTÆFLORA—Colour white, tinged with pink; long footstalks, flowers small, strong grower, and should be in every garden. 6d. each; 5s. per doz.

CYCLOPS—An interesting and remarkable variety; large blue flowers with a distinct rosette of rosy white petals in the centre; long firm stalks, sweetly scented. 6d. each.

KAI SER WILHELM—A fine advance, which we are certain will meet with universal approval. 6d. each; 4s. per doz.

LA FRANCE—A glorious flower; large round petals, metallic blue-violet flowers carried on long stiff stalks, and as large as a two-shilling piece. 6d. each; 5s. per doz.

PRINCESS OF WALES—Its blooms are more like a *Viola* than a Violet. We confidently recommend all growers and lovers of this family to obtain this variety. Award of Merit, R.H.S. 6d. each; 4s. per doz.; 30s. per 100.

RAWSON'S WHITE—White, tinged with pink; very dwarf and free.

THE RUSSIAN AND LONDON—Are of a much dwarfer growth, with small leaves; their runners become quickly interwoven, and in the early spring produce their flowers so thick as to give quite the appearance of a bedding plant. 3s. per doz.

VICTORIA REGINA—Is very similar, possessing a fine flower, long footstalks, and when well grown can be readily distinguished from all older varieties. 6d. each; 4s. per doz.

WHITE CZAR—This variety occasionally changes, and for a time produces purple-coloured flowers, but when it comes true it is a useful single white; strong grower, free bloomer in the spring. 6d. each; 5s. per doz.

YELLOWRETTE (SULPHUREA)—Producing medium-sized flowers of a decided creamy yellow shade; very distinct, and a perfect contrast to all other varieties.

All those not priced 6d. each.

VIOLETS.

We have always a large quantity of fine plants in 5-inch pots, 8s. and 10s. per doz., £3 3s. per 100, of *Swanley White*, *Marie Louise* and *Neapolitan*. Blooms all the winter when grown under glass. Fine clumps from ground now ready to be planted out in cold frames, 4s. per doz.; 30s. per 100.

CANNELL'S REAL MANURE

For GREENHOUSE PLANTS, FOLIAGE and POT PLANTS, ROSES, VINES, FRUIT TREES,
VEGETABLES, FLOWER GARDENS and LAWNS.

ALWAYS AN ABUNDANCE OF FLOWERS.

The properties of this manure go direct to make Flowers, Fruit and Vegetables more brilliant, larger and finer, without the gross foliage. After one gets used to it, they will soon gauge the exact strength that is necessary for any plant desired to have extra fine; the great thing is not to over-apply it, but if used with discretion this is the most convenient and valuable of all manures—its effect in a fortnight is marvelous—and those who use it double their produce. We have several who leave us standing orders for large quantities to be sent at stated times. All are charmed with its results. No greenhouse or garden ought to be without it, and for all who wish to be first at exhibitions it is absolutely necessary. Every shilling so expended gives another in return, often two.

DIRECTIONS FOR USE.

FOR LAND IN GOOD CULTIVATION AND GROWING CROPS.—Three-quarters of an ounce to the square yard, one-and-a-half hundredweight to the acre. Mixed with treble of its quantity of fine, slightly damp soil, and scatter it regularly; you can see to a line how far it has been put.

FOR POOR LAND AND POTATOES.—Four to six hundredweight to an acre.

FOR POTTING.—One ounce to the bushel of good compost, and thoroughly mix.

TOP DRESSING.—Two ounces to a bushel of good soil.

LIQUID MANURE.—Half-ounce to a gallon of water, and increase it a little twice a week until the plants are well in flower.

FOR LAWNS.—Scatter broadcast at the rate of 1½ ounces to the square yard, afterwards to be well watered.

Double production of everything is obtained by using it. Nothing is so important in every part of the garden as two or three applications during the season. It gives more than satisfaction whatever it is applied to, and in most cases trebles the size. A 1-lb. tin will show its effects and guarantee its general use.

1-lb. tin, 1s., post free, 1s. 4d.; 3-lb. tins, 2s. 6d., post free, 3s.; 7 lbs., 4s., post free, 4s. 8d. In bags, 14 lbs., 6s.; 28 lbs., 10s. 6d.; 56 lbs., 18s.; 1 cwt., 30s.

The engraving shows our Exhibit of SWEET PEAS at the Horticultural Hall.

For Seed for Autumn and Early Spring sowing see page 32.
